Waste Reduction

Noise Reduction

Cutting Station

The Cutting Station is a unique purpose-built work station for cutting lengths of metal, such a conduit, cable tray and pipe. Integral health and safety features include fire-rated sound deadening foam to reduce noise pollution and PVC screens to contain and protect from sparks. Fit a chop saw positioned on a rubber mat to reduce HAV, while the innovative design allows the saw to be positioned at a safe working height, minimising risk of accident or injury. The unit can be easily fitted with a dust extraction or an air filtration system to further enhance the health and safety features to protect the operative, as well as those working in the surrounding area.

Features and Benefits

- A multi-purpose unit, with a secure cabinet beneath the workbench area
- 110v power supply, internal sockets and light
- Extending support arms
- Heavy duty wheels
- Sound deadening foam to reduce noise pollution
- Rubber mat to reduce HAV
- PVC curtain to contain sparks
