

Energy Efficient

Waste Reduction

Pop Up PRO iQ10

The new PRO iQ is the world's first push around scissor lift to use intelligent technology, helping keep users safe when on site.

Utilising the saloon safety gates, the iQ also comes equipped with a descent beacon and anti-surf auto braking, while all necessary documentation and information is stored securely in a case at the feet of the operator. With emergency off and lower features also built in, this gives the operator on site a high standard of control no matter what the job.

Features and Benefits

- Simple maintenance
- Diagnostic fault finding
- Anti-surf auto braking
- Saloon safety gates

Product Code 26/2984
